## Before — Normalized Data (15 items, grade computed)

The screenshot shows a workflow editor interface. On the left, the 'Code in JavaScript' node is selected, with the 'Parameters' tab active. The 'Mode' is set to 'Run Once for All Items' and the 'Language' is 'JavaScript'. The JavaScript code is as follows:

```
return {  
  name,  
  email,  
  score: Number(record.score),  
  grade  
};  
  
return normalized.map(record => {  
  json: record  
});
```

On the right, the 'OUTPUT' tab shows 15 items in a table format:
