

Day 20 — Document Ingestion & Embeddings

Screenshot: Stored Vectors in Supabase (public.documents table)

The screenshot displays the Supabase Table Editor interface for the 'documents' table in the 'public' schema. The table contains 120 records, displayed across two pages (Page 1 of 2). The columns are: id (int8), content (text), metadata (jsonb), and embedding (vector). The data shows various topics like Software Development, AI Automation, and Internships, each with a corresponding embedding vector.

id	content	metadata	embedding
1	Software Development	{"loc":{"lines":{"to":1,"from":1}}, "line":1}	[-0.0067379223, 0.020...
